80 lumen 0.85 watt 4-8 volt

Culot à baïonnette (P13) / Pour remplacer une ampoule à filament

Référence: 5855547

Burnt-out bike light bulbs no more!

- Replace the old light bulb of your bike with our high-tech LED bulb.
- The life span of our EnLightPro13 is up to 10 times longer than that of a light bulb.
- Even at walking speed the EnLightPro13 shines with double the intensity of a normal light bulb at full speed.
- You can connect up to three EnLightPro13 as well as your taillight to your dynamo.

Drive safely and drive down your expenses!

- The EnLightPro13 of SYSTART GmbH is compatible with all bicycle lamp sockets and all types of dynamos.
- Normal light bulbs often burn out at full speed because the dynamo generates excess voltage. The surge protector of the EnLightPro13 protects your headlight as well as your taillight.

Technical Information:
